Turn Pair (Reference)

Question (MS. EASTERLING):

And your opinions in that case were -- were they blaming the plaintiff for the incident? (MR. GRINNAN objection: object to the form, foundation.)

Answer (BENJAMIN GIBSON):

I don't think it was necessarily blaming the plaintiff in that case. I think it was noting that Energy Transfer was not involved in that work. They hired that contractor. They -- this guy was the foreman and had chose the means and method, that was more the theme in that case for -- given the nuances of that specific matter.

Strategic Signature

Deflection Advantage

Client Value: 7/10 · **Opposition Value:** 5/10

Summary

The witness, an expert for the plaintiffs, deflects blame away from the plaintiff and onto a foreman/contractor—an entity tied to the defendants—thereby reinforcing the prosecution's narrative that the defendants failed to observe proper safety practices. The testimony, while moderately credible, is contested by an objection and contains qualifiers that could undermine its reliability. The prosecution should capitalize on the blame-shifting evidence while preparing to counter the procedural challenge and the conditional reliability of the witness's statements.

Use This

[HIGH] Call 1 · blame_structure

Gibson explicitly attributes fault to the foreman/contractor, a defendant-aligned party, directly supporting the prosecution's claim of deficient safety practices.

[MEDIUM] Call 3 · inferential_structure

The inductive inference drawn by Gibson provides a logical basis for linking observed failures to defendant negligence, useful for building causation arguments.

[MEDIUM] Call 6 · pattern

The identified pattern of deflection contest demonstrates that the witness is actively shifting blame away from the plaintiff, a narrative advantage for the prosecution.

Watch This

[HIGH] Call 4 · contestability

Prepare to address the objection by citing the witness's qualifications and the relevance of his expert opinion, and be ready to argue that the question was permissible.

[MEDIUM] Call 4 · epistemic_reliability

Emphasize the witness's expertise and the consistency of his testimony with documented safety violations to counter the conditional reliability assessment.

[MEDIUM] Call 4 · distortion_pattern

Use the minimization of plaintiff blame as evidence that the witness is unbiased, and be prepared to counter any suggestion that the witness is attempting to manipulate the narrative.

Call Rank

#1 · Call 1 — Directly shows defendants' fault, core to prosecution's case.

#2 · Call 6 — Highlights the witness's blame-shifting strategy, reinforcing the prosecution's narrative.

#3 · Call 3 — Provides inductive reasoning linking safety failures to defendants.

#4 · Call 4 — Contains potential weaknesses that must be managed.

#5 · Call 5 — Adds context but less critical.

#6 · Call 2 — Pressure dynamics are less relevant to the prosecution's strategy.
