Question (MS. EASTERLING):

And your opinions in that case were -- were they blaming the plaintiff for the incident? (MR. GRINNAN objection: object to the form, foundation.)

Answer (BENJAMIN GIBSON):

I don't think it was necessarily blaming the plaintiff in that case. I think it was noting that Energy Transfer was not involved in that work. They hired that contractor. They -- this guy was the foreman and had chose the means and method, that was more the theme in that case for -- given the nuances of that specific matter.

Call 1 · Response Quality [3/25 · 12.0%]

straightforward [-1] coop

answer: False

→ The witness avoids a direct yes or no, instead reframing the characterization of his prior opinions through a multi-clause explanation that shifts the framing rather than plainly confirming or denying the premise of the question.

comprehensive [-1] type: constrained coop

adds_beyond_scope: True [-2]

stays_within_scope: False [-2]

direct_answers [-1] cred

answer: False

→ The question calls for a yes or no answer about whether prior opinions blamed the plaintiff. The witness sidesteps that binary framing entirely and instead offers a recharacterization of the thematic focus of his prior opinions, which does not directly answer what was asked.

answer: True · confidence: 0.82

enables_efficient [+1] coop

answer: False

→ The response contains some redundancy and circuitous phrasing as the witness works through a distinction, adding words without proportionally adding clarity or precision.

scope_adherence [+3] excellent

answer: True · confidence: 0.85

information_volume [+2] coop

answer: False

→ The witness provides more contextual elaboration than the binary yes-or-no framing of the question strictly requires, though the expansion is not wholly unwarranted given the nuance of the subject matter.

answer: False

→ No sudden or intense emotional expressions are present in the response. The witness delivers a measured, analytical reply without any affective disruption.

stress_signals [+4] coop

answer: False

→ The response proceeds without observable hesitation, tonal shifts, or behavioral irregularities. The witness navigates a potentially adversarial framing without apparent tension.
